

Andrew Sheer, MP
Leader of the Opposition
House of Commons
Ottawa, ON
K1A 0A6

Dear Mr. Scheer,

The recent weather events (hurricanes, floods, droughts and forest fires) point clearly to the risks of climate change. Canadian voters expect the Federal Conservative Party to develop a comprehensive platform to limit GHG emissions to stop the relentless progression of global warming.

As supporters of For Our Grandchildren, we request that you press for inclusion of Climate Change in any discussions with the Trump Administration over changes to NAFTA.

We acknowledge that you have a difficult task in persuading your Western Canadian supporters that Canada must wean its economy off fossil fuels. Still, the Conservative Party cannot simply repeat the mantra so often used by the Harper Government: balancing the environment and the economy. If the Conservatives favour the economy, you should adopt policies facilitating the use of renewable energy.

We look forward to receiving your reply.
